CHARTERS.

40TH GEORGE III.

22ND MARCH, 1800.

GEORGE THE THIRD, by the Grace of God, of Great Britain, France, and Ireland, King, Defender of the Faith, &c. To ALL TO WHOM these Presents shall come, WHEREAS our Royal Predecessor, King Edward IV., by certain Letters Patent, under the Great Seal of England, bearing date the 24th Day of February, in the first Year of his Reign, did at the Supplication of the Freemen of the Mystery of Barbers of the City of London, using the Mystery or Faculty of Surgery, grant to them, among other Things, that the said Mystery, and all the Men of the same Mystery of the said City, should be one Body and Perpetual Community, and that two Principals of the same Commonalty, of the most expert Men in the Mystery of Surgery, might, with the assent of twelve or eight Persons at the least, of the same Community, every Year elect and make out of the Community, two Masters, or Governors, being the most expert in the Mystery of Surgery, to oversee, rule, and govern, the Mystery and Commonalty aforesaid.

Recital of the Letters Patent of 1st Edward 4th;

incorporating the Freemen of the Mystery of Barbers of the City of London.

AND WHEREAS by an Act of Parliament, made and passed in the 32d Year of the late King Henry VIII. intitled for Barbers and Surgeons, after reciting, that, within the City of London, there were then two several and distinct Companies of Surgeons, occupying and exercising the Faculty of Surgery, one Company called the Barbers of London, and the other Company called the Surgeons of London. It was thereby enacted, That the said two several and distinct Companies of Surgeons should from thenceforth be united, and made one intire and whole Body Corporate, and one Commonalty Perpetual, which at all times thereafter should be called by the Name of the Masters or Governors of the Mystery and Commonalty of the Barbers and Surgeons of London; and by the same Name to implead and be impleaded before all manner of Justices, in all Courts, and in all manner of Suits.

Of the Act 32d Henry 8th.

By which the two Companies of Barbers of London, and Surgeons of London were united.

Of the Letters Patent of 5th Charles 1st.

And whereas, in and by certain Letters Patent, under the Great Seal of England, bearing Date the 15th Day of August, in the 5th Year of the Reign of His late Majesty, King Charles I., reciting that the Men of the same Companies enjoyed divers Liberties and Franchises within the City of London, the Suburbs and Liberties thereof, by virtue of divers Acts of Parliament, and divers Charters, and Letters Patent, His said Majesty did grant and confirm unto the said Masters and Governors of the Mystery and Commonalty aforesaid, and their Successors, all and singular the Manors, Messuages, Lands, Tenements, Customs, Liberties, Franchises, Immunities, Jurisdictions, and Hereditaments, whatsoever, which the Men of the said Companies then held, used, and enjoyed, by any lawful Means or Title whatsoever: And his said late Majesty did thereby give power to the said Corporation, to make annual Elections of Masters or Governors of the said Commonalty, whereof two to be Professors in the Art and Science of Surgery; and also to elect and constitute ten of the Freemen of the said Society to be Examiners of Surgeons in London.

Which confirmed to such united Company all the possessions, franchises and liberties which the said Company then held and enjoyed,

with power to make annual Elections of Masters or Governors whereof two to be Professors in Surgery; and to elect ten Freemen to be Examiners.

Recital of the Act of 18th of George 2d.

And whereas, by an Act of Parliament, made and passed in the 18th Year of the Reign of our late Royal Grandfather, King George II., intitled "An Act for making the Surgeons of London, and the Barbers of London, two separate and distinct Corporations," It was enacted, that the said Union and Incorporation of the Barbers and Surgeons of London, made and effected by the aforesaid Act of the 32d Year of King Henry VIII. should, from and after the 24th Day of June, 1745, be dissolved and declared void and of no effect; and that such of the Members of the said united Company who were Freemen of the said Company, and admitted and approved Surgeons, within the Rules of the said Company, and their Successors, should from thenceforth be made, and they were thereby made and constituted, a separate and distinct Body Corporate and Commonalty Perpetual, which at all times thereafter were to be called by the Name of Master, Governors and Commonalty of the Art and Science of Surgeons of London, and by the same Name might implead and be impleaded before all manner of Justices, in all Courts, and in all manner of Actions and Suits, and take to them and their Successors, Lands, Tenements, Rents, or Hereditaments, not exceeding the yearly Value of £200 in the whole.

by which the Union of the two Companies was dissolved;

and which constituted a distinct Company of Surgeons, by the Name of "The Master, Governors, and Commonalty of the Art and Science of Surgeons of London."

Recital that such Corporation was dissolved.

And whereas, we are informed that the said Corporation of Master, Governors, and Commonalty of the Art and Science of Surgeons of Lon-

don, hath become and now is dissolved: And whereas, it is of great consequence to the Commonweal of this Kingdom, that the Art and Science of Surgery should be duly promoted: And whereas, it appears to us, that the Establishment of a College of Surgeons will be expedient for the due promotion and encouragement of the Study and Practice of the said Art and Science, Now We, of our special Grace and mere Motion, and at the humble Petition of James Earle, Esquire, the late Master, and divers other Members of the aforesaid late Corporation of Surgeons; have willed, ordained, constituted, declared, given and granted, and by these Presents, for Us, Our Heirs, and Successors, do will, ordain, constitute, and declare, give and grant; unto the aforesaid James Earle, and unto all the Members of the said late Company or Corporation of Master, Governors, and Commonalty of the Art and Science of Surgeons of London; having been admitted and approved Surgeons, within the Rules of the said Company; and also unto all such Persons, who upon, or since, the dissolution of the said Corporation, shall have obtained Letters Testimonial, under a Seal purporting to be the Seal of the said late dissolved Corporation, authorizing them to practise the Art and Science of Surgery; and they, from henceforth for ever hereafter, shall be and remain by virtue of these Presents, one Body Corporate and Politic; by the Name of The Royal College of Surgeons in London, and by the same Name shall and may have perpetual Succession, and a Common Seal; with power to break, alter, and make anew the said Seal, from time to time at their will and pleasure; and by the same Name shall and may implead, and be impleaded, before all manner of Justices, in all Courts, and in all manner of Actions and Suits; and shall be at all times for ever hereafter persons able and capable in Law to take, purchase, possess, hold, and enjoy, and shall and may take, purchase, possess, hold and enjoy, a Hall or Council-house, with its Appurtenances, situate within the Cities of London or Westminster, or within one Mile of either of them, for the use and purposes of the said College; and also any other Lands, Tenements, Rents, or Hereditaments, wheresoever situate, lying and being; not exceeding, together with the aforesaid Hall or Council-house, and its appurtenances, the yearly value of one thousand Pounds in the whole; without incurring any of the Penalties in any Statute of Mortmain, or any Thing, in any Statute of Mortmain, to the contrary notwithstanding.

That it is of great consequence that the Science of Surgery should be duly promoted,

and that a College will be expedient for the due encouragement thereof.

Therefore His Majesty was pleased to incorporate the Members of the late Company, and all such Persons who since the Dissolution thereof have obtained Letters Testimonial &c.

By the name of "The Royal College of Surgeons in London."

With perpetual succession and a common seal;

and power to hold and enjoy a Council-house within London or Westminster or one mile of either of them; and to possess lands and tenements, including such Council-House of the yearly value of £1000 in mortmain.

And it is Our further Will and Pleasure, that nothing in these Presents

Proviso,—That the City of Lon-

don shall not have any jurisdiction over the College. Nor the Members of the College enjoy any franchise belonging to the Freemen of the City of London.

shall be construed to give the Corporation of the City of London any Power or Jurisdiction over the said College hereby established and incorporated; and that no Person, by virtue of these our Letters Patent, constituted or ordained, or hereafter to be admitted a Member of the said College, shall be thereby entitled to any Franchise belonging to the Freemen of the City of London.

The College to enjoy all other privileges and possessions by any former Acts or Letters Patent, given to, or otherwise acquired by, the late Company, not hereby altered, &c.

And it is Our further Will and Pleasure, and we do hereby, so far as We lawfully can or may, grant and ordain, that the said Royal College of Surgeons hereby incorporated, shall and may exercise and enjoy all and singular other the Gifts, Grants, Liberties, Privileges and Immunities, Possessions, real and personal, whatsoever and wheresoever, hereinbefore mentioned, or by any Act or Acts of Parliament, or by any Letters Patent, of Our Royal Predecessors, Kings and Queens of England given, granted, and confirmed unto, or otherwise lawfully acquired by, and belonging to the said late Master, Governors, and Commonalty of the Art and Science of Surgeons; or any of them, and not hereby altered, taken away, changed, or abridged, made void, or annulled.

The College liable to perform such Duties as the late Company did perform by the Act of 25th George 2d, "For the better preventing the horrid Crime of Murder."

THE COUNCIL.

The Council, the governing body of the College, consists of twenty-four Members, three* of whom, when no vacancy, either by resignation or death, has occurred during the year, go out in rotation annually in July, but are eligible for re-election by the Fellows of the College. All proceedings of the Court of Examiners, the Midwifery and Dental Boards, and the several Committees are reported to the Council for approval and confirmation. The Meetings of the Council are generally held in each month of the year, except in the month of September, and at such other times as the business of the College may require. During the past Collegiate Year there have been thirteen Meetings.

* If in any year one of the three retiring Members be President of the College, he does not go out of office until the succeeding year.

THE COURT OF EXAMINERS.

The Court of Examiners consists of ten Members elected by the Council from the Fellows of the College. The Court superintends the carrying out generally the regulations of the Council relating to the preliminary and professional education of Students, and conducts the professional examinations of Candidates for the Diplomas of Fellow and Member of the College, and of Assistant-Surgeons in the Navy. During the past Collegiate Year the Court has held five Meetings for the Examinations for the Fellowship, and forty-eight Meetings for the Primary and Pass Examinations for the Membership. The following is a statement of the number of Candidates who presented themselves for the Fellowship and Membership respectively, with the results of the several Examinations, viz. :—

BOARD OF EXAMINERS IN DENTAL SURGERY.

The Board consists of six Members elected by the Council for five years, viz.:—three Members of the Court of Examiners of the College, and three other persons skilled in Dental Surgery. The Board conducts the Examination of Candidates for the Diploma in Dental Surgery of the College. During the year four Candidates have been examined, all of whom passed to the satisfaction of the Board.

THE MUSEUM.

The Hunterian Collection, which forms the basis, and still a large proportion, of the contents of the present Museum of the Royal College of Surgeons of England, was originally arranged in a building which its Founder, John Hunter, erected for it in 1784, behind his house in Leicester Square.

John Hunter died October 16th, 1793, aged 64. By his will he directed his Museum to be offered in the first instance to the British Government, on such terms as might be considered reasonable, and in case of refusal, to be sold in one lot, either to some foreign state, or as his executors might think proper.

In the year 1799 Parliament voted the sum of £15,000 for the Museum, and an offer of it being made to the Corporation of Surgeons, it was accepted on the terms proposed by Government*.

In 1806 the sum of £15,000 was voted by Parliament in aid of the erection of an edifice for the display and arrangement of the Hunterian Collection ; a second grant of £12,500 was subsequently voted, and upwards of £21,000 having been supplied from the funds of the College, the building was completed in Lincoln's-Inn-Fields, in which the Museum was opened for the inspection of visitors in the year1813.

In consequence of the large number of additions, this building became too small for the adequate display and arrangement of its contents ; and more space being at the same time required for the rapidly increasing Library, the greater portion of the present building was erected, wholly at the expense of the College, in 1835, at a cost of about £40,000, and the Hunterian and Collegiate Collections were

* The following are the Terms and Conditions on which the Hunterian Collection, purchased by Parliament, was delivered to the late Corporation of Surgeons; which Corporation having become dissolved, the Members thereof were re-incorporated by Charter, dated the 22nd day of March, 1800, under the Title of The Royal College of Surgeons in London:—

1st. The Collection shall be open Four Hours in the Forenoon of two days every week for Inspection and Consultation of the Fellows of the College of Physicians, the Members of the Company of Surgeons, and Persons properly introduced by them ; a Catalogue of the Preparations, and a proper Person to explain it, being at those times always in the Room.

2nd. That one Course of Lectures, not less than twenty-four in number, on Comparative Anatomy and other subjects, illustrated by the Preparations, shall be given every year by some Member of the Company.

3rd. That the Preparations shall be kept in a state of Preservation, and the Collection in as perfect a state as possible, at the Expense of the Corporation of Surgeons, subject to the annual Inspection and Superintendence of the Trustees.

4th. That there shall be a Board of Trustees, to consist of sixteen (increased to seventeen by the Lords of the Treasury in 1856) Members, by virtue of their Public Offices, and of fourteen others, to be appointed, in the first instance, by the Lords of the Treasury, and afterwards to be elected, as Vacancies may happen, by a Majority of the remaining Trustees.

5th. That the Museum shall always be open for the Inspection of all or any of the said Trustees, who are to take care that the Corporation of Surgeons perform their Engagements respecting the said Collection. That a day be appointed for the annual Inspection of the Museum, by the Trustees acting collectively as a Board ; and that they are also to have quarterly Meetings, for the transacting of any Business relative to the Museum, and for the filling up of such Vacancies as may happen in the number of the Trustees ; and that the Corporation of Surgeons shall engage some Person to officiate as Secretary to the Board upon such occasions, and to issue previous Notices to the Members, in which he is to state particularly whether any Vacancies are to be filled up by new Elections.

re-arranged in what are now termed the Western and Middle Museums, which were opened for the inspection of visitors in 1836.

Further enlargement of the building having become necessary by the continued increase of the Collection, the College, in 1847, purchased the extensive premises of Mr. Alderman Copeland, in Portugal Street, for the sum of £16,000, and in 1852 proceeded to the erection of the Eastern Museum, at the expense of £25,000, Parliament granting £15,000 in aid thereof. The re-arrangement of the specimens was completed, and the additional portion of the building opened to visitors in 1855.

The Hunterian Collection was estimated to consist of 13,682 specimens, distributed under the following heads:—

Physiological Department, or Normal Structures.

Physiological preparations in spirit	3745
Osteological preparations	965
Dry do.	617
Zoological do.	1968
Fossils:—	
Vertebrate	1215
Invertebrate	2202
Plants	292

Pathological Department, or Abnormal Structures.

Preparations in spirit	1084
Dry preparations (including bones)	625
Calculi and concretions	536
Monsters and malformations	218
Microscopic Preparations	215

Of the additions by which the size and value of the Collection have been so materially increased since it came into the possession of the College, very many have been presented by Fellows and Members of the College, and other persons interested in scientific pursuits. Among the largest contributions from this source have been the Collection, consisting of 847 specimens, presented in 1811 by Sir William Blizard, and a valuable series of Pathological specimens presented in 1851 by Sir Stephen L. Hammick. At the same time the Council of the College have availed themselves of various opportunities as they have occurred to purchase specimens of interest, especially at the dispersion of private anatomical and pathological museums, as that of Sir A. Lever in 1806, of Mr. Joshua Brookes in 1828, of Mr. Heaviside in 1829, Mr. Langstaff in 1835, Mr. South in the same year, Mr. Howship and Mr. Taunton in 1841, Mr. Liston in 1842, Mr. Walker in 1843, and, deserving of especial mention on account of the great number and value of the specimens acquired, that of Sir Astley Cooper in 1843.

The Histological Collection, of which the 215 Hunterian specimens (prepared by Hewson) constitute the nucleus, was chiefly formed by the late Professor Quekett, with considerable additions by purchase from Dr. Tweedy J. Todd, Mr. Nasmyth, and Professor Lenhossek. It now contains upwards of 12,000 specimens, all arranged and catalogued so as to be readily available for reference.

The superintendence of the Museum is confided by the Council of the College to a Committee of its Members, which Committee has held ten meetings during the pasty ear.

A summary of the progress made in the preservation, arrangement, and augmentation of the Collection will be found in the following Report:—

ANNUAL REPORT OF THE CONSERVATOR TO THE MUSEUM COMMITTEE.

(Presented June 29th, 1868.)

I have the honour of submitting to the Committee the Report on the present condition of the Museum, and the principal occurrences which have taken place in it, during the past twelve months, and as usual will divide the remarks that I shall have occasion to make into several sections.

I. Pathological Collection.

Although I am unable on this occasion to report any such extraordinary increase to this department of the Museum as that of "The Toynbee Collection illustrative of Diseases of the Ear," added last year, the new specimens have been considerably above the average in number. This is especially due to the donation by Mr. Mackmurdo of the whole of his collection of Anatomical specimens, including many of diseased bones, and to the addition of twenty-six specimens illustrating injuries and diseases of the jaws, received with Mr. Christopher Heath's Jacksonian Prize Essay on that subject. Besides these, there are many contributions of great value and interest from various donors, whose names appear in the appended list, chiefly, as heretofore, Members of the Council of the College.

II. Osteological Collection.

The transference into the Museum, and cataloguing of the Osteological specimens, which had for so long been accumulating in the store-rooms in the basement, has made considerable progress. Among others, 165 more or less perfect skeletons of birds, some Hunterian, many others purchased with Mr. Gould's Australian Collection in 1840, and which have since remained in a condition and situation which rendered them quite unavailable for examination, have been cleaned and placed in glass-topped boxes in the drawers devoted to Ornithic Osteology in the Eastern Museum. I have not yet had time to identify or enter the whole of these in the Catalogue, especially as the difficulty of doing so is much increased in many cases by the loss of the original labels, and of all means of ascertaining the source from which they were obtained.

Numerous additions have been made to the series of separately mounted homologous bones, which now forms a very important feature of the Museum.

The following list shows the number of examples of each bone at present exhibited in the cases:—

Cranium in section	22
Ramus of mandible	49
Hyoid bones	30
Vertebral column, either complete or partial	75
Sternum	430
Ribs	40
Clavicle	16
Scapula	66

The Collection of Human Osteology has received a considerable addition in a series of skulls, chiefly showing individual peculiarities of conformation, or illustrating developmental changes, presented by Mr. Mackmurdo. A large number of separate bones of the human skeleton, presented by the same gentleman, together with others previously in the College stores, have been arranged in drawers in the Western Museum, and will be useful in affording to the Anatomical Student an opportunity of examining and comparing the variations presented by each individual part of the skeleton. It will be desirable further to increase this series, as every aspect of Human Osteology ought to be represented to the fullest extent in the College Museum.

The series of Comparative Anthropology has received important additions in two skeletons of Negroes from West Africa, presented by Staff-Surgeon J. R. Thomas and Professor Huxley; a young female of the same race, from North America, presented by Professor L. J. Sanford, of Yale College, and various crania, including three from Vancouver's Island, one of which shows a remarkable form of artificial distortion.

Among the articulated skeletons of animals which have been added to the Museum during the year, that of a full-grown male Sperm-Whale or Cachalot (*Physeter macrocephalus*) must be specially mentioned. The animal from which this magnificent and instructive specimen was obtained was taken off the coast of Tasmania, in November 1864, and the bones were prepared with

great care and at considerable expense, expressly for this Museum, by Mr. W. L. Crowther, M.R.C.S., surgeon to the General Hospital, Hobart Town, whose numerous and valuable donations to the Museum I have had frequent occasion to mention in former Reports They arrived in England in May 1865, and after undergoing a further process of cleaning, the skeleton was articulated and suspended to the roof of the Eastern Museum, having been completed in September last. The skeleton, as now mounted, is 50 feet 1 inch long, of which the cranium occupies 16 feet 9 inches; and it weighs nearly two and a half tons. Mr. Crowther's energy and liberality in obtaining and presenting this specimen to the Museum has also been the means of furnishing materials for a detailed and fully illustrated description of the osteology of this strangely modified Mammal*, hitherto a desideratum in scientific literature; and it should be mentioned that nothing has been spared on the part of the College, either in labour or expense, in articulating and displaying it to the greatest advantage. All the various difficulties encountered in moving, and finally adjusting in their respective places the ponderous and unwieldy fragments of the skeleton were successfully overcome by the mechanical skill and resources of our experienced articulator, Mr. James Flower, and head carpenter, Jonathan Pearson, ably and willingly assisted on occasions by the whole of the Museum Staff.

The opportunity of comparing and contrasting in the same Museum the skeleton of the Sperm-Whale, with that of the Greenland Whalebone-Whale (*Balæna mysticetus*) materially adds to the value of each.

As the skeleton of a young Giraffe, purchased in 1837, was but an inadequate representative in the Museum Series of this interesting form, advantage was taken of the death of the large male belonging to the Zoological Society to secure a better specimen. The small skeleton was disposed of†, and that of the adult substituted for it, as the space in the Museum was too limited to admit of the exhibition of both. The skeleton is perfect in every detail, and mounted in the new method, by which the head, neck, limbs, tail and portions of the trunk can be removed from each other and separately examined.

The roughly prepared skeleton of the great Armadillo (*Priodontes giyas*) from Surinam, one of the most remarkable of a very singular group of animals, purchased rather more than a year ago, from Professor Krauss, of Stuttgardt, has recently been cleaned and articulated. This is the largest of the existing Armadillos, though still far inferior in size to its extinct ally the Glyptodon. The skeleton is quite perfect; the hyoid, sesamoid, chevron, and other small bones being all in their correct position; and it is rendered more interesting by being accompanied by the skin of the same individual, from one side of which the epidermal layer has been removed, so as to expose the large quantity of osseous tissue which, in the form of

† It is now in the Museum of the Leeds Philosophical Society.

distinct plates, pervades every part, not only of the hard dorsal carapace, but also of the integument of the head, limbs, tail, and even abdomen.

The important series of articulated skeletons of Anthropoid Apes has received an accession in a skeleton of a nearly adult female Orang-outang.

Another fine skeleton, which may be specially mentioned as being the first of its species ever sent to Europe, is that of the Chinese White Dolphin (*Delphinus sinensis*) which, with other specimens, was most liberally presented to the Museum by Mr. Robert Swinhoe, H.B.M. Consul at Amoy. I hope shortly to be able to prepare an account of this hitherto undescribed skeleton for the Zoological Society, according to the donor's wish.

Dr. George Bennett, of Sydney, has added another to the numerous contributions he has on various occasions made to the Museum, in the skeleton of one of the rarest of birds, the Tooth-billed Pigeon (*Didunculus strigirostris*), from the Samoan Islands; and we are indebted to Professor Newton, of Cambridge, and his brother Mr. E. Newton, for an interesting series of bones of the extinct short-winged bird of the Island of Rodriguez, the "Solitaire" (*Pezophaps solitarius*), allied to the Dodo of the Mauritius.

Valuable presents of a series of skeletons and skulls of the Ibex and Chamois of North Italy, from Sir James Hudson, G.C.B., and of a very fine German Wild Boar from H.R.H. the Crown Prince of Prussia (at the request of Professor Peters, Director of the Zoological Museum, Berlin,) may be mentioned, though as they are not yet sufficiently prepared to be placed in the Museum, they cannot be included in the appended list.

III. Zoology of Invertebrate Animals.

In my last Report I sketched out a proposal for a re-arrangement and condensation of the various Collections of undissected specimens and hard parts of Invertebrate animals, recent and fossil, with a view of making them more available than hitherto for educational purposes, and also to gain the space which will soon be required for the expansion of other portions of the Collection. During the past twelve months this object has been steadily pursued and is, in fact, the principal improvement that has been made in the Museum during the year. It has occupied much of my time; but with the duty of constant supervision of all departments of the Museum, and keeping up the Catalogues, to which must be added the incessant and apparently inevitable interruptions to continuous work, occasioned by visitors, correspondence, and small matters of routine business, I should have made comparatively little progress, but for the able assistance of Mr. W. S. Kent, a gentleman who has been specially engaged for this duty, for the past four months.

As the work is not quite terminated, I shall leave to my next Report the details of the mode in which it has been carried out, but may mention that, so far as it had proceeded, it elicited the special commendation of the Hunterian Trustees, who, in their Annual Report on the state of the Collection, drawn up at the Meeting of the 9th of May last, state—"We are

also gratified to find that many of the old Hunterian specimens, both wet and dry, have now been incorporated in a typical series of Invertebrata, arranged in zoological order, so as to afford great facilities to Students in the Natural History Sciences, and supply a want which has been much felt."

IV. Physiological Series.

The old collection remains in the same condition as before. I hope on the completion of the re-arrangement of the department last treated of, to commence the long-needed revision of the catalogue of this most important series. In the meanwhile additions are continually being made as opportunities occur. Many of those shown on the present occasion are the work of the late assistant in the Museum, Dr. J. B. Pettigrew. This gentleman, in January last, resigned the office he had held for five years, on account of an impairment of vision (it may be hoped, only temporary) occasioned by over-exerting his eyes in following out a series of minute researches into the arrangement of the muscular fibres of various hollow viscera, the results of which were communicated in several papers to the Royal Society.

I am glad to take this opportunity of acknowledging the numerous improvements in the methods of preparing and mounting anatomical specimens which Dr. Pettigrew introduced into this Institution, and especially in originating a higher standard of excellence in finishing preparations in spirit than had been thought necessary before, and which I hope will never be departed from.

For many of the specimens added to the Physiological as well as the Osteological Series, our thanks are due to the interest taken in the Museum by the accomplished Secretary of the Zoological Society, Mr. P. L. Sclater, and also to Dr. Murie, the Prosector to the same Society, who has been most obliging in preserving and transmitting to the College such portions of animals which have died in the Gardens as appeared desirable additions to the Collection. Some instructive specimens, showing early stages of the development of the human brain, prepared by the President of the College, Mr. Hilton, have been added to the Physiological Series during the past year.

V. Hunterian Manuscripts.

During the past year various manuscripts, hitherto under the care of the Conservator, have been examined with a view to the separation and better preservation of such as are in any way connected with John Hunter. All those which were found to have no direct reference to the Museum, have been transferred to the Library, where they will be more appropriately placed, and more accessible to any one who wishes to consult them.

The manuscripts consist of:—1. Notes of Hunter's Lectures taken by various pupils at different dates. 2. Hunter's original case-books mostly in the handwriting of his assistants, with notes and additions by himself. 3. Some of the original MSS. of Hunter's papers and works on anatomical

and zoological subjects. 4. Some of the original Catalogues of the Museum, compiled under Hunter's direction, and with his corrections. 5. A large mass of transcripts of Hunterian MSS., made chiefly by Mr. Clift, the originals of which are no longer in existence.

Of these, all the more important have been published, and are to be found either in Palmer's edition of Hunter's works (1835), Hunter's 'Essays and Observations' (1861), edited by Professor Owen, or in the various Catalogues and Publications of the College. The unpublished writings consist chiefly of records of cases, and post-mortem examinations (upwards of 700 in number), and short notes and memoranda on surgical subjects, many of a very brief and fragmentary character. A list of these has been prepared and entered in the Museum Report-Book for reference, in case the question of the propriety of publishing them should ever be brought before the consideration of the Council.

I conclude this Report with a list of the new specimens added to the Museum during the year.

THE LIBRARY.

The formation of a regular Library may be said to have commenced in the year 1801, at which time and in succeeding years presentations and bequests of books, often in considerable numbers, were made to the College; the principal donors being Dr. Baillie, Sir Everard Home, Sir Charles Blicke, the widow of Mr. Sharp, Sir Ludford Harvey, Dr. Fleming, Mr. Cotton, and Mr. Long. The Court of Assistants also directed from time to time the expenditure of small sums of money for the purchase of books, and eventually voted a sum of £100 per annum for this purpose. Sir Charles Blicke, in the year 1816, invested the sum of £300, the proceeds of which sum were to be devoted to the same object. Some of the purchases thus made were considerable, as in the cases of the Libraries of Mr. Pitt, Mr. St. Andre, and Sir Anthony Carlisle, and books of importance were added at the recommendation of the Conservator of the Museum and others. In this way a Library of considerable value was gradually accumulated, but it was only accessible to a limited number of persons. In 1827 active steps were taken to render it more generally useful, and with this object catalogues and extensive lists of desirable acquisitions were ordered to be prepared. Large sums of money were also expended during this and the ensuing two years, amounting in the aggregate to nearly £6000. A Librarian was appointed, and in 1828 the Library, then containing 10,500 volumes, was thrown open to members of the College, and all other persons engaged in the pursuit of natural science were freely admitted. This large collection, thus opened, offered great facilities to the studious. By means of extensive additions, the collection was well-nigh complete in works on Medicine and Surgery, both domestic and foreign, whilst it was also very rich in publications relating to the accessory sciences. The transactions of Academies and Societies, and the collection of periodical publications in general, owing to their completeness, and the difficulty with which access can be obtained to this class of literature elsewhere than in large libraries, formed a valuable feature. The maintenance of the Library from that time to the present has involved a very considerable expenditure of the funds of the College. It has been the object of those to whose care it has been confided to ensure the completeness and excellence of the collection, and great facilities of reference have been provided by the preparation of additional catalogues and indexes of subjects. During the last year there have been added to the Library 461 volumes, comprising 130 new works, and 550 tracts, pamphlets, and theses. The entire collection now contains 32,108 volumes, consisting of 13,350 works and 35,239 tracts, pamphlets, and theses.

The following is a list of the donations presented to the Library during the year, viz.:—

Mr. Curgenven. The Waste of Infant Life; and on the Contagious Diseases Act of 1866.
